Sub :- Finance Internship Letter

Dear Sir,

Through XYZ Financial Group's website, I learned about your organization's present vacant opportunities. I am profoundly intrigued with securing a position in the XYZ Financial Group's Global Equity Internship Program.

I am currently pursuing second year of my post graduation degree in Finance at the ABC Business School of the State University. Last year I consummated an internship with First National Bank and am at present interning with the University's Student Federal Credit Union.

My main interest in joining XYZ Financial Group stems from its impressive reputation. I feel the firm's diverse clientele, astronomically immense market capitalization, and well-known internship program that would provide me with an invaluable experience to complement my studies at Business School. I believe that I would prosper in the firm's exhilarating and motivated environment and that my vigorous work ethic, ability, and ardency would make me a valuable asset to your firm.

I would prefer to work in global equity, however I am disposed to consider any position that you offer me. Please find my resume and educational certificates enclosed with this letter. Thank you for your consideration and I look forward to verbalizing with you in the near future.

Regards,
Roger Benny
